DETAILED ACTION

Claims 1-156 are cancelled and new claims 157-200 are presented in response to last Non-final office action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 157-168 and 169-181, drawn to risk management, classified in class 705, subclass 38.
- II. Claims 182-193 and 194-200, drawn to enterprise related data and metadata, classified in class 707, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because I is directed to risk management optimization, and invention II is directed to computer performing metadata mapping. The subcombination has separate utility such as integrating data.

Art Unit: 3628

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
